

Pranali Website Design Brief & Technical Specification

Digital Experience & Structural Architecture Framework

1. Executive Summary & Brand Philosophy

Pranali Space is a multidisciplinary platform dedicated to ecological restoration, multispecies coexistence, regenerative systems, and indigenous knowledge. The website design must embody a non-human-centric perspective—framing human activity as part of, rather than distinct from, natural ecological cycles.

The digital space should act as an extension of the physical ecosystem: organic, spacious, clean, and deeply intuitive. It must feel grounded yet dynamic, steering clear of standard corporate web structures in favor of a flow-based, elemental interaction model.

2. Design & Styling Guidelines

Typography

- Primary Font:** Alegreya (Serif)
- Usage:** Headings, subheadings, and body text across all components to establish an organic, literary, grounded, and enduring tone.

Color Palette

Palette Role	Tone Name	Color Concept & Application
Primary Base	Tree Green #0F5E36	Representing flora, growth, and living systems. Primary focal elements and headings.

Palette Role	Tone Name	Color Concept & Application
Primary Accent	Crimson Red #DC143C	Representing soil, heat, vitality, and traditional craftsmanship. Interactive states and calls to action.
Secondary Accent	Burgundy Brown #763939	Representing roots, soil, and baseline foundation. Structural borders, metadata, and subheadings.
Background	Warm Neutral Off-White	Clean, uncluttered canvas providing a minimalist, generous, and breathable atmosphere.

Visual Aesthetic & Layout Principles

- Clean, modern, minimalist layout prioritized around whitespace.
- Organic shape transitions avoiding harsh geometric sharp edges.
- Micro-interactions that mirror natural physics (gentle easing, bloom effects, continuous flow).

3. Interactive Hero Section & Navigation Concept

The primary entry experience reimagines standard web navigation through a central interactive motif.

Interaction Architecture & Logic

1. Initial State:

A minimalist landing view centered around a subtle, animated spiral motif representing unmanifest potential.

2. User Interaction:

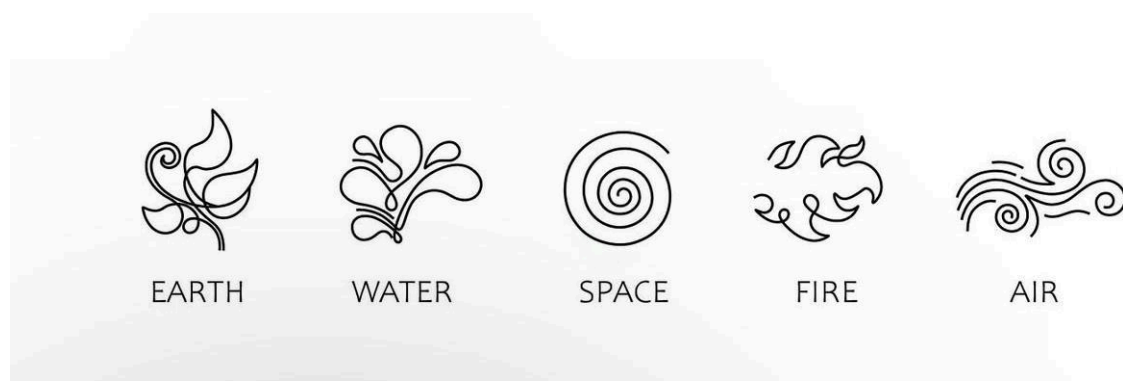

Clicking, tapping, or scrolling over the central spiral initiates an expansion animation ("blooming").

3. Node Expansion:

Five elemental nodes expand outward along the natural flow of the spiral geometry.

4. Sequential Element Order:

- **Earth** (*Bhumi* / Earth Systems)
- **Water** (*Jal* / Hydrological Cycles)
- **Space** (*Akasha* / Ether & Spatial Realm)
- **Fire** (*Agni* / Transformation & Vitality)
- **Air** (*Vayu* / Atmosphere & Circulation)

4. Mapping Knowledge Hubs & Offerings

The 7 core knowledge hubs and operational arms of Pranali are organized under the 5 elemental pillars:

5. Earth (Equanimity, Value and Distribution) West Direction

1. **Sustainable Product Ecosystem:** E-commerce space for earth-aligned food products, organic clothing, and circular home appliances.
2. **Regenerate Landscape :** Design, strategic planning, and implementation of regenerative farm landscapes and living agricultural systems.

4. Water (Fluidity, Grounding and clarity with depth and stillness) East Direction

1. **Ecological Courses:** Online and infield educational modules covering multispecies living, regenerative agriculture, and indigenous practices.
2. **Publications:** Production and distribution of educational manuals, books, newsletters, and video series advocating for multispecies justice.

3. Space (Whole, interconnectedness and openness for Emergence) Center

- **Access & Membership Infrastructure:** Core system infrastructure managing member-tier permissions vs. open public access.

2. Fire (Perception, Reception and Relationships) South Direction

1. **Community Gatherings & Hosting Workshops:** Hosting community dining experiences, seasonal brunches, ecological events, and physical space venue rentals.

- 2. **Retreats & Festivals:** Immersive ecology retreats and seasonal festivals hosted across diverse ecological venues in Nepal.

1. Air (Ideas to completion,Compassion in Motion) North Direction

- 1. **Policy and Action:** Collaborative initiatives with government bodies and urban planning entities for communal landscape projects.
- 2. **Projects and Activism:** Farmfit, and activism around Pancha Pranali and campaigns

5. Access & Membership Model

Feature / Content Area	Free Public Tier	Member Tier
Advocacy & Publications	Access to public newsletters, media clips, and core manifestos	Full downloads of educational manuals, research papers, and books
Courses & Learning	Introductory course previews and syllabus overviews	Unrestricted access to full infield and online learning modules
Events & Gatherings	View public event calendars and civic project summaries	Priority booking for dining events, seasonal retreats, and festivals
Services & Consultations	Overview of consulting frameworks	Direct portal for consultation inquiries and project onboarding

6. Functional & Technical Requirements

Responsive Behavior

- Multi-device scaling (Desktop, Tablet, Mobile).
- Mobile fallback for the interactive spiral: transitions into a touch-friendly accordion or fluid arc menu without losing thematic intent.

Animation Specifications

- Fluid SVG or HTML5 Canvas rendering for the spiral and elemental node expansions.
- Frame rates locked to 60fps with optimized performant transition curves.

Technical Performance & Standards

- Fast load times through asset optimization and lightweight vector structures.
- Full compliance with WCAG accessibility standards (contrast ratios, keyboard navigation accessibility for interactive nodes, aria-labels).
- Clean code architecture with clear visual fallback states for reduced-motion browser preferences.
